MEMORANDUM OF UNDERSTANDING
Between
THE YUOK TRIBE
And
USDA-FOREST SERVICE
SIX RIVERS NATIONAL FOREST

This Memorandum of Understanding (MOU) is entered into by the Yurok Tribe, here after referred to as the Tribe, and the United States Department of Agriculture - Forest Service, Six Rivers National Forest, here after referred to as the Forest Service.

I. PURPOSE:

The purpose of this MOU is to continue the governmental cooperation between the parties concerning wildland fire and wildland fire use management activities on the Six Rivers National Forest. This cooperation provides for the protection of significant cultural resources important to the Tribe, Forest Service, and the public. This agreement also gives clear direction to the Tribe and Forest Service for purposes of "rates of pay" that are commensurate to the complexity of Incident Management Organizational Roles & Responsibilities for assigned Tribal resources as outlined in Attachment "A" of this MOU. It further provides for the Tribe to be contacted, allows for expedient consultation with the Tribe, and for Tribal concerns to be considered in the management of wildland fire while providing for safe, effective, and cost efficient wildland fire and wildland fire use management activities.

II. STATEMENT OF MUTUAL BENEFITS AND INTERESTS:

The Tribe and the Forest Service through an established Government-to-Government protocol agreement, the National Historic Preservation Act, the Native American Graves Protection and Repatriation Act, American Indian Religious Freedom Act, Sacred Sites Executive Order 13007, Executive Order No. 13175 on Consultation and Coordination with Indian Tribal Governments and other statutes and regulations, share mutual interests related to the effects of wildland fire management on significant cultural resources and properties.

The Parties will work within a cooperative approach to incident management that provides safe and effective wildland fire management activities within the area of mutual interest identified in the Government-to-Government protocol agreement.

Protecting cultural resources while providing a fire management environment, which fosters focused attention to safety, incident objectives, and firefighting fundamentals, will be furthered when all parties work together to understand one another's priorities and responsibilities.

The demands of incident management require that firm planning and activity schedules be maintained and often preclude lengthy consideration of long term issues during the management of the incident. It is in the best interest of all parties to identify and address these types of concerns through the process established in the formal Government-to-Government protocol agreement.

In consideration of the above premises, the parties agree as follows:

III. TRIBE SHALL:

In such cases, consultation with the Tribe will be initiated as soon as practical thereafter.

E. In addition to consultation with the Tribe and the Heritage Consultants, the Forest Service will make every attempt to meet various heritage and natural resource laws by consulting with other interested traditional practitioners and publics regarding heritage resources on National Forest System lands.
